

Ahh yes .... Babies. If my memory serves me right, babies were first discovered by villagers in northern Japan. While the Emperor's bath had a drain, commoners did not. After a few unfortunate incidents, commoners had a saying "don't throw baby out with bath water".

**And so remember "don't throw baby out with bath water"**

**“浴室水と赤ん坊を投げてはいけない”**

鹿賀 丈史(Chairman Takeshi Kaga)
